

Earth Environment Hall 3F

In the “Earth Environment Hall”,
you can explore the journey from the
birth of the universe to the present day.
The exhibition covers the origin of the universe,
the planets of the solar system,
dynamic geological phenomena such as
earthquakes and volcanoes,
the formation of caves,
a variety of minerals and rocks,
and even the geological history
of the Korean Peninsula.

Life Evolutionary Hall 2F

In the “Life Evolutionary Hall”, we can
learn about the evolutionary process of
life that has been constantly evolving
from the first life to the Paleozoic
trilobites, Mesozoic dinosaurs,
and Cenozoic humans.
Also you can see various creatures
currently living on Earth through,
the “Realistic Content”
and the “Interactive
Media Wall”.
